Liquid, organic fertiliser.  
Contains organic iron, plant  
extracts and homeopathy.

- ✓ Increased stress-tolerance
- ✓ Fast Results
- ✓ Sustainable strengthening of  
plant and soil
- ✓ Well absorbed by plants
- ✓ Healthy growth
- ✓ Vigorous and vivid plants

**Application recommendation for:** Perennials, young plants, ornamental plants, vegetables and herbs.

**Apply once a year**, in spring or  
shortly before planting. Sprinkle  
soil with substrate and work slightly  
into the soil.

Trees and Bushes.50-150 g per m<sup>2</sup>  
Roses.....100-200 g per m<sup>2</sup>  
Lawns (new).....100-120 g per m<sup>2</sup>  
Cut Flowers.....80-120 g per m<sup>2</sup>  
Potted Plants.....50-70 g per m<sup>2</sup>  
Substrate-Mixture...2,5-4 kg per m<sup>3</sup>

(Heaped spoonful of **AMN Natural  
Activ®-bio** = ca. 20g)

**Apply frequently, every 10 – 14  
days (pouring or spraying).**

Mix with **5-10 ml of concentrate  
per litre of water.**

**Best results are achieved, if  
whole leave gets wetted.**

**Apply in main growing period  
(Spring/Summer):**

**Frequently, every 10-14 days**

- either **pour:**  
Mix concentrate with **5ml per  
litre water**
- or **spray over leaves:**  
Mix concentrate with **3ml per  
litre water**

In **dark season**, use the same  
dosages every 20 days.

**Please note:** Shake liquids well before use! Use mixed products within 24 hours. Please find exact quantities of special cultures, helpful tips and security notes on the respective product labelling or in the detailed product information sheet. This BASE RECIPE is only an indicative application proposal and does not replace an individual consultation.

Our **AMN® (Active-Micro-Nutrients) products** pursue the way of a **vitalising cultivation of plants**. The benefit of a vitalising plant production is that the **defence and immune system of the plants is fully functional**. Thereby, the **risks of getting pests and diseases become very low** and the plants are **prepared to withstand periods of stress**. The use of **conventional plant protection is no longer necessary** or can be reduced drastically. **All of our products are produced in a sustainable manner and with organic resources**. The products do not harm beneficial insects. If used properly and as advised, there is no danger for the environment, humans or animals.

**All products comply with EC-directive VO (EG) 834/2007 and EC-directive VO (EG) 889/2008 and are approved for organic farming. Products are listed with FiBL, ECOCERT EU 889/2008 allowed Annex 1.**
